

March 2019 Updates

Wednesday, March 27, 2019

A bug that could allow a user to do a payout when using too many reward points on a transaction.
A bug preventing users from reapplying reward points to a transaction if they have been removed.
A bug that would allow users to finalize duplicate End of Day Processes
A bug that could stop the End of Day Process from completing their End of Day Process by closing the browser tab.
The text on the End of Day button was not updating properly if a user canceled their End of Day Process.
A customer's reward points total was not disappearing from the Checkout tab after the transaction was completed.
A customer's reward points balance was showing on Checkout when Reward Points was turned off in Settings.

Thursday, March 14, 2019

Additional QuickBooks sync issues.
A bug preventing payins.
Consignor ID wasn't showing on the Terminal report anymore.
A bug that could show users unapplied payments when doing a payin.
A bug that could show the wrong window when using certain processors when doing a payin.

Friday, March 8, 2019

When Fortis users were canceling a payment on a transaction, it would go through as a refund instead of a void.
A rare bug that could cause Consignor Access fees to be charged when they weren't supposed to.

Wednesday, March 6, 2019

Additional QuickBooks sync issues.
An issue causing items to show at the wrong location.

Monday, March 4, 2019

QuickBooks was failing to sync.
